PROFILE

Full Stack Developer and AI/ML Engineer finishing a BSCS at the Islamia University of Bahawalpur. Focused on turning trained machine learning models into real, deployed products — comfortable across the stack from FastAPI/Flask backends to Next.js/React front-ends, with scikit-learn and XGBoost in between.

SKILLS

Languages	Python, TypeScript, JavaScript, SQL, HTML5, CSS3
Frontend	Next.js, React, Tailwind CSS, Recharts, Framer Motion
Backend & ML/AI	FastAPI, Flask, scikit-learn, XGBoost, Pandas, NumPy
Database & Cloud	PostgreSQL, Neon, SQLite, AWS IoT, Vercel, MQTT

FEATURED PROJECTS

InsureCalc — Medical Insurance Cost Predictor

[Next.js](#) · [FastAPI](#) · [Python](#) · R^2 99.3%

Medical insurance cost predictor built on 4 ML models, with animated regional cost maps and a savings estimator for lifestyle changes.

CardioScan — Heart Attack Risk Prediction

[Next.js](#) · [XGBoost](#) · AUC ~94%

Heart attack risk prediction using an XGBoost + Random Forest + KNN ensemble, with a live ECG-style hero and a what-if risk simulator.

GlucoseGuard — Diabetes Risk Classification

[Next.js](#) · [scikit-learn](#) · AUC ~83%

Diabetes risk classification via a 3-model ensemble (RF, LR, SVM) with SHAP-style explainability and downloadable PDF reports.

SEMS — Smart Energy Management System

[Flask](#) · [AWS IoT](#) · [ARIMA](#) · $MAPE$ 7.4%

Final-year project: ESP32 + MQTT (TLS 1.3) real-time monitoring, ARIMA 7-day forecasting, anomaly detection, and LoRaWAN for off-grid deployment.

Face Recognition Attendance System

[Flask](#) · [PostgreSQL](#) · [Face-API.js](#)

Real-time face detection and recognition attendance system with student profiles, analytics, and CSV export.

Chinook Analytics — SQL BI Dashboard

[SQL](#) · [Python](#)

End-to-end business-intelligence dashboard over the Chinook music-store dataset: revenue, markets, RFM segments, and forecasting.

EDUCATION

BSCS — Bachelor of Science in Computer Science
Islamia University of Bahawalpur

2023 – 2025
